ABOUT MOON RUNNINGS

WHAT?

A One-Woman Storytelling Experience about how LUNARVILLE:JANNALI – The Space Heritage Site on the Moon came into being. The initiative was conceived by the United Planetary Society to Assure Rights to Space – a global organization ignited by passion and led by a group of advocates and actionaries representing the 99 percent of non-billionaire space enthusiasts. Their mission is their vision. Their vision – a Lunar settlement where all are welcome. Ad Luna. Ad Astra. Ad Futura. Space For All Humanity.

ABOUT MOON RUNNINGS

WHY?

As humans make preparations for deepening and widening of space exploration, it is vital that we engage people in exploring their assumptions about our futures in space as well as to tell stories that enable the creation of a shared vision for the evolution of human space exploration. With the race on to settle the moon, our nearest satellite, how will we share space? How will we remember go forward in peace? How will we meet the future with reverence for our shared heritage in space?

ABOUT MOON RUNNINGS

RATIONALE?

Stories are the way humans communicate. Through story we help to create community and shared experiences of our past, present and presence as well as our futures. Through story we attempt create or find common ground. Telling the story of human settlement on the moon from the perspective of a national of a small island nation (JAMAICA) sends an important signal of the need and importance of including all nations big and small in the dialogue about how we share space and the future we want.

WELCOME to...

LUNARVILLE: JANNALI

THE PLACE OF HUMAN HERITAGE ON THE MOON

IN THE BEGINNING...

The moment of truth ... My Quest for the Planetary
Consciousness .. Which led me to research the Moon
Where I ran into the Lunar Embassy and the fact that
someone was trying to sell the moon Seriously!

BC

DEFG

This is where I would tell if needed a folk tale from the Aboriginal people of Australia about the Moon as well as a story from Kenya (the first human) or the Dogon people and then also talk about ASTROLOGY

THE VAULT OF LUNAR HERITAGE

MOONOLOGY A-Z

HIJKLMN OP

TELLING THE LUNATHON

This is the story of the SPACE GOODWILL GAMES. The inciting moment was when I found out that Space Force was going to be built and was worried that with the race of space on rocky ground the Cold War would resume and thus SPACE race between the superpowers would become combative. The games was proposed to spread the gospel of PEACE in SPACE.

QRSTUV

THE SANCTUARY OF ALL RELIGIONS

This is the story of WHY and How We Designed the Sanctuary of All Religions. The inciting moment is when the man said the moon is up there doing NOTHING. Before Moon Commerce ...There was Moon Gazing and Moon Worship...
